LYTTTELTON PORT OF CHRISTCHURCH SHARES FEEDBACK ON PORT LYTTTELTON PLAN WITH COMMUNITY

The Senior Team from Lyttelton Port of Christchurch (LPC) were at the Company's information centre, "Port Talk" in Lyttelton Street, this morning (Saturday 29 November) from 10am to 1pm to share and discuss with the community the feedback received about the 30 year vision for the Port's development.

LPC has released a summary of the feedback received about the Port Lyttelton Plan (PLP).

The PLP outlines how the Port can be rebuilt and enhanced to efficiently and sustainably cater for Canterbury's freight demands, now and in the future.

The feedback summary has been put together in a booklet called 'Your Voice'. It has been published on the PLP website and can be picked up from Port Talk. Follow this link to read it: <http://www.portlytteltonplan.co.nz/index.html>

"We have engaged with the community and other stakeholders to find out their views and obtain feedback as early as possible in the planning process," said LPC Chief Executive Peter Davie.

"In parallel, LPC has also developed a package of information on the redevelopment plans, their effects and any changes needed to regulatory documents and presented this, along with a summary of the stakeholder engagement process, to Environment Canterbury in mid-November.

"LPC is committed to ensuring the community and stakeholders are kept fully informed as the Plan progresses."
