

## Customer Notice – Lyttelton Inbound Container Pickup

25<sup>th</sup> March 2020

Further to our previous notice reminding all customers of the importance of still picking up inbound containers that arrive at LPC, we would like to give an update on potential storage and transport options available to cargo owners.

In the first instance, we suggest that you check with your preferred trucking company or freight forwarder. Many of these organisations have storage areas available for containers and our feedback is there is some spare capacity presently in Christchurch to be able to accommodate.

To facilitate linking storage and transport options with those who need them we have started a page on our website that will assist in highlighting those providers who have spare capacity or services. Storage and transport providers – please email [paul.williams@lpc.co.nz](mailto:paul.williams@lpc.co.nz) if you would like to add your contact details to this list.

<http://www.lpc.co.nz/our-services/vehicle-booking-system-vbs/>

In addition LPC are working on providing extra storage capacity at MidlandPort and CityDepot if needed. We will revert shortly with the details but this will be limited capacity and only available for a small amount of overflow cargo, so we encourage cargo owners to find other alternatives. At this point our normal free time and demurrage rules will apply to all cargo.

We appreciate your ongoing cooperation and please feel free to contact us if you have any queries.
