CUSTOMER NOTICE

CITYDEPOT VEHICLE BOOKING SYSTEM

As advised late last year we are on track to implement a truck Vehicle Booking System (via the 1-Stop system) at our City Depot site from 20th February 2018.

We will shortly be ready to start some hands on training for trucking companies on how to use the VBS and would like to start scheduling training sessions so there is plenty of time to get used to the system before we go live.

The training will consist of 1 hour workshops and will be hands on making and changing bookings and gaining an overall understanding of how the system works. It is aimed towards a trucking company despatcher level but you are welcome to also send your supervisors etc. as required. Materials will be provided to each participant to take back to the office and use as a reference once we go live.

The training session times are listed below and you will need to book in to a session as there are limited spots in each to ensure everyone gets a computer to use.

We would like to ask all trucking companies that presently use City Depot to send us your training time preferences, including the names and positions of participants, from the below selection as soon as possible to Abbey Ray on email vbs@lpc.co.nz

We will respond with confirmation of the exact details and appreciate your flexibility if some of the sessions are already booked out.
