

Marine Health & Safety Policy

Lyttelton Port Company fully supports the objectives of the Port and Harbour Marine Safety Code.

The Marine Health & Safety Policy supports the application of the LPC wide "Our Health & Safety Policy".

LPC has developed an extensive system to manage health and safety risks in the port including Marine activities. LPC's Marine management is underpinned by principle continuous improvement and adoption of industry good practice. We will comply with:

- Legal responsibilities
- Port and Harbour Marine Safety Code Objectives
- ECan's Regional Navigation Bylaws and Directions
- Applicable codes and standards

Our Marine Health & Safety Commitments are based on the three pillars of the LPC Health and Safety System;

Demonstrate Leadership:

- All management and leaderships positions within the Marine function shall demonstrate visible and committed safety leadership
- All staff are encouraged and supported to take personal responsibility to prevent risk to the health and safety of themselves and others

Workhage HomeSafe

Our port assets are:

- Operated in compliance with all applicable legislation, regulation, codes, standards, manufacturer's directions and good practices
- Are included in a planned maintenance system
- Operated by competent persons

Systems

Develop, and comply with, a Safety Management System that includes:

- Clearly defined accountabilities and responsibilities
- Strong risk assessment and management practices
- Processes to ensure all personnel are competent to perform their assigned roles
- Development of a positive and proactive safety culture
- Continuous improvement processes
- Measures to ensure emergency preparedness
- The reporting of all incidents, near misses and hazards

Roger Gray Chief Executive
